

Antimicrobial System Having a Major impact on Wrestling World in 2009... **wrestling**package

From Clean Path Solutions

As a proud partner of the National Wrestling Coaches Association (NWCA), C.P.S. / SportsCoatings developed the Wrestling Package to provide programs at every level an affordable way to eliminate illness-causing microorganisms and inhibit bacteria and fungi growth **24/7** for the **entire season**. Prior to the start of the 2008-09 campaign, coaches and athletic directors in universities and high schools across the country used the Wrestling Package to stay one step ahead of bacteria and fungi. Midway through the season, some of the country's most respected coaches have weighed in on their experiences with C.P.S. / Sport Coatings' nationally-renowned antimicrobial system.

January 26, 2009

"Half way through the season, I can say without question that this team has experienced the lowest number of skin infection breakouts since I've been coaching. The evidence is pretty clear to me. We use the antimicrobial system and we don't have any problems. We don't, and we have problems."

Steve Garland, Wrestling Head Coach University of Virginia
Applied the leading-edge antimicrobial power of the Wrestling Package to his mats in September 2009.

January 17, 2009

"Using this antimicrobial system has had such a positive impact on our program. This season my team has had significantly fewer skin ailments than last year. I'm much more confident that our team won't be hit hard by skin issues, which makes it so much easier for the team to focus on wrestling."

Brian Smith, Wrestling Head Coach University of Missouri
Applied the innovative antimicrobial technology in the Wrestling Package to his facilities mats, and weight room in August 2008.

The year's biggest tournaments are almost here. Give the dedicated wrestlers in your area mats and equipment that's been treated with the most proactive solution to bacteria and fungi with the Wrestling Package from Clean Path Solutions / Sport Coatings.
